Patient Evacuation Training Simplified

DMS-06011

Patient Movement Workflow

1 Room Evacuation

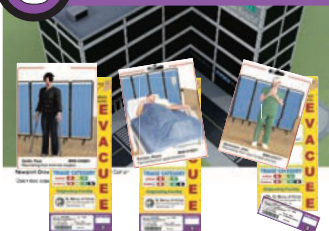

Nursing staff prepare and evacuate 10 patients from their rooms to a staging area using Evac123@ Tags. Prioritize patients and manage your limited movement resources.

2 Staging & Transport

The Staging Manager uses transport cards and works with off-site destination facilities to move patients in the best possible method.

3 Destination Receiving

Effectively distribute patients to receiving facilities based off care levels and bed type availability. Provide verification when patients arrive safely.

Anytime Training Optimized

You no longer need to rely on drills to ensure your facility's level of evacuation preparedness is optimized. Using this innovative, portable learning tool, staff can engage in hands-on training anytime or anywhere. Tabletops provide enhanced learning by allowing all players to see and appreciate their counterparts' tasks in real-time. This engaging kit takes tabletops to the next level by engaging players as they interact together to move patients through the evacuation process in an immersive 3D graphic environment. It's team building in a fun and educational way.

Turnkey Portable Package

WARNING
Cancer and Reproductive Harm
www.P65Warnings.ca.gov

Contents:

- Large, 6 Ft. Roll-Out Vinyl Map with Case
- 2 Destination Facility Maps
- 10 Oversize Patient Cards
- 4 Oversize Transport Cards
- 4 Inject Cards
- Quick Start Guide
- Evac123@ Tag Pack (DMS-05854)
- Evacuation Receipt Holder Pack (DMS-05855)
- Transportation Receipt Holder Pack (DMS-05858)
- Destination Receipt Holder Pack (DMS-05859)
- Patient Chart Binder w/ Patient Labels

Key Features:

- ▶ Teaches How To Prioritize Patients & Resource Management
- ▶ HICS Compliant
