

All Risk® SALT Triage Tag w/ Patient Wristband by DMS

Enhanced Method • Triage • Treatment • Transport

Optimized for use as a secondary assessment and patient tracking tool, the All Risk® SALT Triage Tag provides personnel the ability to document patient condition and care while awaiting transport. Enhanced transportation receipt, when used with the receipt holder, streamlines ambulance loading and ensures that patient number, acuity and destination are documented and available for quick reference. All Risk® Triage Tags are printed on waterproof / blood proof synthetic paper for durability and long-lasting record keeping.

The form is divided into several sections:
Top Section: Includes 'TRANSPORTATION RECEIPT' with fields for Tag Number (4869), Destination, Via, Time, and Chief Complaint.
Left Side: Features a 'WRISTBAND' area with patient information like Name, Age, Sex, and a 'CONTAMINATED' indicator.
Center: Contains the 'SALT' triage protocol flowchart, including 'Step 1: Sort' and 'Step 2: Assess: Individual Assessment'. It also has a 'Blast Injury' indicator and a 'Tourniquet Applied' field.
Right Side: Includes a 'WRISTBAND' area with patient information like Name, Age, Sex, and a 'CONTAMINATED' indicator.
Bottom: Features a 'RE-TRIAGED' section with color-coded status indicators: DEAD, EXPECTANT, IMMEDIATE, DELAYED, and MINOR.
Bottom Right: Includes a 'DMS-05739' label and a 'WRISTBAND' area with patient information like Name, Age, Sex, and a 'CONTAMINATED' indicator.

DMS-05739

Key Features:

- ▶ Waterproof / Blood Proof
