TRIAGE

Master the Art of MCI Triage in an Immersive 3D Environment.

There's never been anything close to this. Bravo!

- Henrie Watkins - Emergency Preparedness Educator

Taking Triage Instruction to the Next Level

As a member of a first-on-scene triage unit, you will be immersed in a video-based lesson plan and learn all aspects of S.T.A.R.T. triage. From triage unit tactics to proper patient care - critical learning components are taught. This course takes you beyond just knowing what S.T.A.R.T. triage is, it ensures you have the knowledge to use it effectively in an MCI setting.

Comprehensive Curriculum

The 2-hour stop-and-resume course overcomes the learning limitations of slideshow training by fully engaging students as they progressively gain knowledge after each chapter is completed. Course quizzes test their newly acquired skills and a comprehensive 20-page study guide is provided for the final open-book exam as well as a certificate for those that complete the course.

Continuing Education Credits

Earn as you learn with the available CE version of the course. Two EMS-CE credits are awarded to students who complete the course with an 80% proficiency or better.
