

Delayed Treatment Area Manager Job Action Sheet

Your job is to account for and treat patients entering your treatment area and to advise the **Casualty Care Unit Leader** when you have a patient that is stabilized and ready to ship.

Receiving Patients

- 1 When a **Porter** delivers a patient, assign a **Triage Tag** to the patient.
- 2 Once a patient has a tag, place the **Porter** in the **Porter Staging Area**.
- 3 Remove the tag's unnecessary acuity receipts to indicate it is a **Delayed** patient.
- 4 Remove one of the **Delayed receipts** and place it in the **patient accountability log**.
- 5 Document treatment provided to stabilize the patient. The patient can now be shipped.
- 6 Advise the **Casualty Care Unit Leader** you have a patient ready to ship.

Diagram illustrating the process of receiving a patient and documenting it in the Treatment Area Manager (TAM) system:

- 3 A patient is shown with a **TRIAS TAG** and a **DELATED** tag. The tag has a **DELATED** receipt.
- 4 A **DELATED** tag is shown being placed into the **Treatment Area Manager** system.

Tag Utilization

- 1 Use tag front and back to document condition and care.
